DEMO DATA - fictional candidate. Not a real person or resume.

Alex Rivera
Software Engineer (New Graduate)
Email: alex.rivera.demo@example.com | Location: Demo City (fictional)

SUMMARY
Recent B.Tech Computer Science graduate seeking a Software Engineer role. Comfortable with Java, Python, SQL, and JavaScript. Built REST APIs, React UIs, and PostgreSQL schemas in internships and course projects. Practices DSA and OOP regularly. Basic Docker experience. No production Kafka or AWS ownership.

SKILLS
Languages: Java, Python, SQL, JavaScript
Web: REST APIs, React
Data: PostgreSQL, Git
Concepts: Data Structures and Algorithms, Object-Oriented Programming
Tools: basic Docker (build/run images locally)
Not yet used in a job: Spring Boot, Kafka, AWS, large-scale system design

EDUCATION
B.Tech, Computer Science - Northbridge Institute of Technology (fictional)
Graduation: 2025 | Coursework: DSA, OOP, DBMS, Operating Systems, Networks

EXPERIENCE
Software Engineering Intern - HarborByte Software (fictional company)
Jun 2024 - Aug 2024 | Backend / API team
- Designed REST endpoints in Java for an internal order-status service
- Wrote PostgreSQL queries and simple indexes for order lookup
- Added request validation, error responses, and unit tests
- Helped the frontend consume APIs; used Git pull requests daily
- Did not deploy to AWS or operate message queues

PROJECTS
Campus Marketplace API (fictional) - Java, REST, PostgreSQL, Git
CRUD listings, JWT-style session tokens in a class project, OpenAPI notes.

DemoCart e-commerce UI (fictional) - React, JavaScript, REST
Product list, cart, and checkout screens calling a mock REST backend.

StudyBuddy grade predictor (fictional) - Python, scikit-learn
Small ML classifier on a public toy dataset; CSV in, accuracy report out.

Docker notes
Local Dockerfile for the Campus Marketplace API; image run on localhost only.
